

Single Self Adhesive Stamps

Self adhesive un-mounted mint stamps are assumed to have the 'backing' attached. In general, the backing paper will be square cut around the stamp giving a distinct border. Original printings came with the surplus paper surrounding the stamps (the matrix) still attached. However the norm is now for this paper surplus (matrix) to be stripped away during stamp production. Singles from some presentation packs have been prepared specially in that the die-cutting has been punched through the backing paper giving true 'stamp' shapes.

Additional Security Stamps

These stamps with additional security features were introduced in 2009 as part of Royal Mail’s attempt at revenue protection. With the addition of four ‘U’ shaped cuts at the lower sides of each stamp, soaking off of unstamped, or uncanceled stamps, is virtually impossible. This has caused concern among some collectors who prefer to collect used stamps, whether for continuity of their present used collection or purely for cost reasons. There have been claims by some that they have overcome these security features but we are not convinced this can be done on a reliable and continuous basis.

This part of our catalogue is divided into four sections covering the four sources of these stamps, namely:-

- 1) Counter Sheets
- 2) Booklets
- 3) Business sheets
- or 4) Coils or Reel.

Each heading and sub heading is clearly defined as to which stamps are covered in that particular area. Also for those collectors new to this area of collecting, we have compiled the following guide to help identify any individual stamp.

Determining the Source

This is very easy using the following guide. Once you know the source of your stamp(s) you can go onto the next stage to identify the Source Code and Date Code.

Counter Sheets

All singles stamps from Counter sheets are ‘rouletted’ on at least 3 sides and have plain backs.

Booklets

Singles from booklets are printed on the back with solid colour(s). They should always have been cut from the book using a scalpel - NOT scissors.

Business Sheets

Singles from business sheets are plain on the back and may have rouletting on the top or bottom of the backing.

Coils (Reels)

These are the easiest of all to determine. They are supplied on a backing paper with straight edges each side, and again should be cut from the roll with a scalpel.

Type 1

Type 2

Type 3

Type 4

Type5

- Type I Standard size definitives [ex Booklets of 6, 12, Business Sheets and Rolls]
 with the word ‘MAIL’ unchanged [ex counter sheets]
 with the word ‘MAIL’ having a substitution of the letter ‘A’ e.g ‘MSIL’, ‘MTIL’, etc
- Type II Large NVI [ex Booklets of 4 - issued 2009]
 with the word ‘ROYAL’ unchanged [ex counter sheets]
 with the word ‘ROYAL’ change to ‘FOYAL’; coming out of the central cross of the diadem
- Type III Large NVI [ex Business Sheets]
 with the word ‘ROYAL’ changed to ‘ROYBL’ coming out of the front jewels of the diadem
- Type IV Large NVI [ex Booklets of 4 - 2010 issue]
 with the word ‘MAI’ (clipped off ‘L’) changed to ‘MFI’ coming out of the rear of the central cross of the diadem
- Type V Large NVI [ex Booklets of 4 and Business Sheets - 2011 issue]
 with the word ‘MAIL’ changed to ‘MBIL’ or ‘MFIL’ coming out of the rear of the Queens dress

The hidden source codes - F, S, B, C, R or P use the following nomenclature:-

- F Booklets of Four
- S Booklets of Six
- B Business Sheets
- C Booklets with Machins & Commemoratives (Special Issues)
- R Rolls or Coils
- P Prestige Books

Self-Adhesive Issues Additional Security Single Stamps Queen Elizabeth II

During the production of some of these issues it was noted that there were changes in the die used for the elliptical perforations. This resulted in some ellipses having a continuous cut while others were interrupted to differing degrees. These varieties are beyond the scope of this work but will be found in Section S of the MCC's QEII Specialised Definitive Catalogue.

Pictorial Post & Go Labels

These were produced in sets of six different designs. When labels are printed from the Post & Go machine its possible to get any one of the six designs for any of the tariff rates. Therefore, to have all the combinations, 36 labels (six designs by six tariff rates) are possible.

Self Adhesive Books & Business Sheets

This section of the Stoneham catalogue has been completely re-arranged to simplify finding any book or Business sheet issued. These have been arranged primarily in value order, followed by quantity. Starting with the 100 x 2nd products below, we then move on to the 50 x 2nd, then 12 x 2nd, 10 x 2nd, 6 x 2nd and finally 4 x 2nd. The sequence is then repeated for First class products containing definitives whether they are Machins or definitive sized special issues. These are followed by the ever increasing range of 6 x 1st containing 4 x 1st Machins and 2 Special Issue stamps. Then we list all the Denominated and overseas rate books followed by all the Christmas issues. This part of the catalogue is completed with the listing of the very special, non standard products.

There are many varieties on these which are beyond the scope of this catalogue, but full details can be found in the Machin Collectors Club QEII Specialised Definitives catalogue.

Details of some of the varieties known to date are indicated by the following abbreviations at the right of the *Contents* line:-

MP-Missing phosphor ILB-Inset Left Band IRB-Inset Right Band
SBT-Short Band Top SBB-Short Band Bottom
IMP-Imperforate (Kiss die-cut omitted)
